

ABSTRACT OF THE DISCLOSURE

COORDINATING MANUFACTURING BY LOCAL AND REMOTE MANUFACTURERS FOR
A PERSONALIZED DESIGN IN AN ELECTRONIC COMMERCE SYSTEM

5

A method, system and program for coordinating multiple local and remote manufacturers for a manufacturing order is provided. A manufacturing order from a user is divided into multiple manufacturable parts. Next, a local bid request for the manufacturing order is submitted to multiple local manufacturers. In response to receiving multiple local bids for the manufacturing order, a remote bid request is submitted to multiple remote manufacturers for bidding on a selection of the manufacturable parts as requested in the local bids. The user selects from the bid options provided by local and remote manufacturers.
